

A map of Alabama showing its 67 counties, each labeled with its name. The counties are colored based on their population density, with a legend in the bottom right corner. The legend shows three categories: '50 and Below' (lightest yellow), '51 - 150' (medium yellow), and '151 - 500' (darkest yellow). A compass rose in the top right corner indicates North (N), South (S), East (E), and West (W). The map shows that the highest population density (151 - 500) is concentrated in the central and southern parts of the state, particularly around the Birmingham area (Jefferson, Shelby, and parts of Madison and Morgan). The lowest population density (50 and Below) is found in the northern and western parts of the state, including counties like Colbert, Franklin, and Marion.
